Oncologic Emergencies

Jacob Stein, MD

Fellow

Division of Hematology & Oncology

UNC Lineberger Comprehensive Cancer Center

UNC School of Medicine

University of North Carolina at Chapel Hill

LECTURE DESCRIPTION

A review of several of the most common clinical emergencies that occur with malignancy and how to manage them, with tips on management and discussion of common misconceptions.

LEARNING OUTCOMES

- Recognize several of the most common oncologic emergencies, including spinal cord compression, SVC syndrome and hypercalcemia.
- Recall key diagnostic steps in identifying these oncologic emergencies as well as pathophysiologic mechanisms.
- Describe the approach to management of acute malignant spinal cord compression, SVC syndrome, and hypercalcemia.
